# Program Pricing for 2023-24

## **Program Cost**

The program fees listed below are paid directly to Eagle Academy via our online payment system and are utilized in paying for our host facility, insurance, and miscellaneous school needs throughout the year.

### **Early** Application Fee, if enrolled by March 31, 2023

- \$175 for first student
- \$125 for second student from same family
- \$100 for each additional student

### **Standard** Application Fee, if enrolled by April 30, 2023

- \$225 for first student
- \$175 for second student from same family
- \$100 for each additional student

### **Summer** Application Fee, if enrolled May 1, 2023 or after

- \$275 for first student
- \$225 for second student from same family
- \$100 for each additional student

### **Senior** Fee

- Additional \$100 if participating in graduation ceremony
- Additional \$50 if not participating in graduation ceremony
- Cap & Gown not included in fee.

## **Tuition**

Tuition fees will be paid directly to instructors via our online payment system.

1.5 hour class = \$320 per year

1 hour class = \$240 per year

- Single-semester classes are pro-rated to \$120 per semester

*Eagle Academy recommends paying instructors in quarterly payments which are initiated on August 1, October 1, January 1, and March 1. Payment in full is available should you desire.*

## **Class Fees**

Several of our classes need additional supplies and have an associated class fee. If a class has a fee associated with it, the fee will be listed in the course description. Science fees are paid to Eagle Academy to cover lab supplies and are collected at the same time as paying your application fee. All other class fees are paid directly to instructors and are paid at the time you pay tuition.

## **Study Hall Fees**

Study halls are monitored by an adult and are an opportunity for students to complete academic assignments. Students are **NOT** to use study hall times to take exams or quizzes. **Study hall fees are \$25/semester**, are payable in full, and are collected online at the same time as paying your application fee.

## **Refunds & Insufficient Funds**

Registration fees, tuition, class fees, and study hall fees are all non-refundable. The Eagle Board and instructors have to make decisions and purchases based on how many students are enrolled. Prayerfully consider enrolling in Eagle Academy and the classes on offer in light of this financial commitment.

If at anytime your account has insufficient funds, a fee will be charged in accordance with any bank charges incurred by Eagle Academy or an instructor.

# Course Descriptions

## *English and Literature Department*

Our middle school through 9th grade English courses are from the Institute for Excellence in Writing. IEW is an exceptional skill-building program, which requires an incremental, working knowledge of the course's development. The entry-level class, English Structure & Style Level B, is recommended for any middle school student taking IEW for the first time, regardless of their grade level.

Literature books are listed in order of their use throughout the school year and can be purchased or rented from the library. Please be sure to obtain these books in advance so your student is properly prepared for class assignments.

### Classics Club

Middle School students will enjoy this discussion-based class featuring several beloved classics. Homework will consist of reading the books at home and class time will feature guided discussion. The aim of this class is to introduce students to understanding and analyzing literature using Socratic questioning and to have them become familiar with some of the best authors of the 20<sup>th</sup> century. A book project will be due after the completion of each book.

**Please make sure you get copies matching the ISBNs laid out below. It can be extremely frustrating for the class, the student, and the instructor, when multiple versions of the book are attempting to be used in the class context. If you have any trouble finding a copy of the book, please reach out to the instructor for assistance.**

Grade Level: middle school

Instructor: Wanda Fisher

Class Minimum Size: 4 students

## English Structure & Style Level B

Join IEW as we lead students on a writing journey using IEW’s Structure and Style approach. The curriculum provides clear, daily assignments and includes vocabulary words. Easy to use and affordable, Structure and Style® for Students brings a successful solution to your writing lessons—guaranteed! In class, students will receive full instruction while being offered question and answer sessions. The instructor will provide recommended reading for students.

Grade Level: 7<sup>th</sup>

## English with American Literature

This course introduces students to American literature in a chronological, historical, and artistic context while developing skills in writing and literary analysis. Students will perform in-depth research throughout this advanced high school course. By the program's end, students have an understanding of the historical and cultural contexts of the works and are able to present thoughtfully developed ideas in writing, display competence in essay composition, and demonstrate proficiency in the MLA style of source documentation.

## English with World Literature

Your student will enjoy a great selection of world literature in this powerful curriculum designed from a biblical worldview. Students will study beloved classics while developing vocabulary, reading, and critical-thinking skills. Serving as a well-crafted presentation of whole-book or whole-work selections from the major genres of classic literature (prose, poetry, and drama), this course has 34 chapters with an overview of narrative background material on the writers, their historical settings, and their worldview. Providing thorough college-prep coverage, students will be able to demonstrate competence in literary analysis, essay composition, and proficiency in the MLA style of source documentation.

Grade Level: 10<sup>th</sup>

<i>Students will also read approximately 5-6 books which will be finalized prior to summer starting.</i>		

## ***History Department***

Using a variety of curricula, our history department provides students with exciting and informative facts from every era. One such curriculum, BiblioPlan, provides a classical, multi-level history program for homeschoolers in the areas of Biblical History, World History, and Church History, from creation to modern times. Full-color pages feature a basic text, bolded Scripture, and color-coded sidebars covering such proprietary topics as Fascinating Facts, Scripture Spotlights, Interesting Individuals, Giants of the Faith, and other engaging information.

### **Mapping the World**

Students can become junior cartographers and learn to map the world with this wonderful aid to geographical literacy. Extraordinary results are achieved by using this incremental program, which gives students a real sense of the world's layout. A variety of exceptional activities are used to develop both map-drawing and map-reading skills. Students will focus on ten regional maps: Canada, US, Mexico, Central America, South America, Africa, Europe, Eastern Europe and North Asia, South Asia, and Oceania.

Grade Level: middle school

Instructor: Greta Gilliland

Class Minimum Size: 3 students

\*Offered every other year

<b>Books</b>	<b>Author</b>	<b>ISBN</b>
<i>Class binder, maps, and all supplies provided by instructor</i>		
\$55.00 class fee, payable via the online payment system		

### **Tennessee History**

We will be using a variety of resources to give students a comprehensive view of Tennessee's geography, history, people, places, historic landmarks, and civics. There will be minimal homework and no exams for this class, and field trips will be provided as an additional option to encourage your student to take advantage of the history in our local area.

Grade Level: middle school

Instructor: Michelle Bouse

Class Minimum Size: 10 students

<b>Books</b>	<b>Author</b>	<b>ISBN</b>
<i>Class binder and resources provided by instructor</i>		
\$50.00 class fee, payable via the online payment system		

## American Heroes & Heroines

One of the most important things lacking in today's educational environment is a healthy admiration of role models. Oftentimes we emphasize the flaws of people who were once considered heroes. Where are the role models we can hold up today as examples of heroism, innovation, courage, or virtue? All of the people we will be studying in this one semester class will be people who made some sort of unique contribution to America. All of them had their flaws (and don't we all?), but all of them did something extraordinary, traversed a great continent, or accomplished some magnificent thing that many thought impossible. Some gave their lives in pursuit of the dream they pursued, some almost lost their lives, and some simply grew old and grey, and watched from the sidelines, as America grow bigger and stronger and wiser. This **one-semester course** is for middle school students, and will require some type of written report from the student, and other means of evaluation.

Grade Level: middle school

Instructor: Wanda Fisher

Class Minimum Size: 4 students

Books	Author	ISBN
<i>Class binder and resources provided by instructor</i>		
\$25.00 class fee, payable via the online payment system		

## Ancient History

Biblioplan Year One covers World and Biblical History from Creation through the Fall of Rome. On the World History side, we start with the four oldest known civilizations: Egyptian, Sumerian, Harappan, and Chinese. It flows from there to the great empires of the Ancient Near East—from Egyptian and Akkadian to Assyrian, Babylonian, Hittite, Persian, and more. Then come the Greco-Persian Wars, Classical Greece, the Roman Republic, and the Roman Empire. Mixed in are empires and cultures from China, India, the Americas, and Africa beyond Egypt. On the Biblical History side, we cover both the Old Testament and the New. Since the events in the Bible all happened in ancient times, all our Biblical History falls in Year One. Later years cover Church History and Christian missions.

***Please ensure you get the new text book (not the “Ancients Companion” we’ve used in years past) and the correct editions of the workbook.***

Grade Level: 9<sup>th</sup>

Instructor: Greta Gilliland

Class Minimum Size: 3 students

HS Credit: 0.5 World History credit

0.5 World Geography credit

Year One Books	Author

## Medieval History

BiblioPlan Medieval History offers students a perfect blend of comprehension, variety, and adventure! Using an engaging, full-color text, this curriculum takes the core subjects of history and geography, and makes them explode with interest by telling stories in an exciting and fascinating way. This course covers Western European and Church History, Asia, Africa, Pre-Columbian America, the Age of Discovery, the Renaissance, the Protestant Reformation, Elizabethan England, and the accompanying geographic regions.

Grade Level: 10<sup>th</sup>

## US History

Give your student a narrative study of American history, from the time before there were boundary lines, all the way to America’s involvement in space exploration and beyond. This text provides a rich understanding of our nation’s past by reading the historical narrative and primary source documents, while studying what the Bible says about issues and ideas in history.

Grade Level: 11<sup>th</sup>

## American Government

This **one-semester course** will give an overview of how our government was designed to function with an emphasis on studying the Constitution in an easy-to-understand format. Students will learn the responsibilities of the Executive, Legislative, and Judicial branches at the federal, state, and local levels. We will also explore how the framers constructed the Constitution to ensure that governmental powers are ultimately derived from “We the People.”

Grade Level: 12<sup>th</sup>

## Constitutional Literacy

Knowing and understanding our Constitution is key to preserving not only America’s liberties and freedoms but also our own. Throughout this course, we will learn about the events of 1776 and the Declaration of Independence, then on to 1787 and the Constitutional Convention. Next we will go step by step through the constitutional amendments, right up to the current debates in our nation over topics such as nullification, D.C. Statehood, impeachment, the Electoral College, 1st Amendment Freedom of Religion, individual God-given rights versus group government-given rights, evolving the Constitution, and much more.

## Survey of World History

This course is designed for upper-level high school students to practice and develop independent learning. They will journey on a trip around the globe as they study history from creation to today, and expand their Christian worldview while forming their own understanding of world history trends, philosophies, and events. History is the consideration about how we have come so far; and there are two primary points of view about the way history is formed...and thus remembered. One says that history is nothing more than arbitrary events connected by happenstance. The opposite point of view — this author’s point of view — argues that there is a design, purpose, or pattern in history, which is an unfolding of God’s plan for the world.

Grade Level: 10-12<sup>th</sup>

## Mathematics Department

Math-U-See is a comprehensive math curriculum program, ideal for homeschoolers. Each level concentrates on a specific set of skills, while continuously reviewing and integrating topics and concepts presented in previous levels.

New to Eagle and unsure what level your student should take? Please use this placement tool for students in 6th-8th grade that have not yet completed Pre-Algebra: [placement.mathusee.com](http://placement.mathusee.com). For levels beyond Pre-Algebra, please take note of the prerequisites listed in each description.

### Math-U-See Epsilon

Ideal for students that have learned basic operations with whole numbers, students will progress to these same operations with fractions. Fractions are presented in an intuitive way with visual explanations of equivalent fractions, common denominators, and fractions and numbers larger than one. Major skills include recognizing and generating equivalent fractions and fluently understanding addition, subtraction, multiplication, and division of fractions and mixed numbers.

- Families have the option of purchasing Fraction Overlays (manipulatives) for at-home use, but a set will also be available in the classroom for student use.
- You can read more about the *Epsilon* level of math, including the scope, sequence, and example videos here: <https://store.demmelearning.com/math-u-see/general-math/epsilon/>

Grade Level: 6<sup>th</sup>

Instructor: Carole Miller

Class Minimum Size:

Books	Author	ISBN
<i>Math-U-See Epsilon Level Up Set</i> <i>OPTIONAL: Fraction Overlays</i>	Math-U-See <a href="http://www.christianbook.com">www.christianbook.com</a>	WW500548

### Math-U-See Zeta

In this level students will learn to complete core operations with decimals, in addition to being presented with the connections between fractions and decimals.

- Families have the option of purchasing an Integer Block Kit and Algebra/Decimal Inserts (manipulatives) for at-home use, but a set of each will also be available in the classroom for student use.
- You can read more about *Zeta* level of math, including the scope, sequence, and example videos here: <https://store.demmelearning.com/math-u-see/general-math/zeta/>

Grade Level: 6-7<sup>th</sup>

Instructor: Carole Miller

Class Minimum Size:

Books	Author	ISBN
<i>Math-U-See Zeta Level Up Set</i> <i>OPTIONAL: Integer Block Kit</i> <i>OPTIONAL: Algebra/Decimal Inserts</i>	Math-U-See <a href="http://www.christianbook.com">www.christianbook.com</a>	WW500674

## Math-U-See Pre-Algebra

The *Pre-Algebra* level of Math-U-See covers negative numbers including adding, subtracting, multiplying, and dividing negative numbers, the order of operations, solving for the unknown, number lines, and more. Major concepts and skills include fluently adding, subtracting, multiplying, and dividing positive and negative numbers; understanding and simplifying exponents; using properties of operations, order of operations, and absolute value; expanding understanding of place value; evaluating radicals; identifying the least common multiple and greatest common factor.

- Families have the option of purchasing an Integer Block Kit and Algebra/Decimal Inserts (manipulatives) for at-home use, but a set of each will also be available in the classroom for student use.
- You can read more about Math-U-See's *Pre-Algebra* level of math, including the scope, sequence, and example videos here:

<https://store.demmelearning.com/math-u-see/secondary-math/prealgebra/>

Grade Level: 7-8<sup>th</sup>

Instructor: Carole Miller

Class Minimum Size:

Books	Author	ISBN
<i>Math-U-See Pre-Algebra Level Up Set</i> <i>OPTIONAL: Integer Block Kit</i> <i>OPTIONAL: Algebra/Decimal Inserts</i>	Math-U-See <a href="http://www.christianbook.com">www.christianbook.com</a>	WW500586

## Algebra 1

The *Algebra 1* level of Math-U-See continues seamlessly from Pre-Algebra and covers graphing, simultaneous equations, exponents, polynomials, unit multipliers, and more. Major concepts include graphing linear equations and inequalities; describing linear equations in slope-intercept and standard form; solving systems of equations using graphing, substitution, and elimination; expanding understanding of exponents; solving basic quadratic equations with factoring; using unit multipliers to convert between units of measure.

- Families have the option of purchasing an Integer Block Kit and Algebra/Decimal Inserts (manipulatives) for at-home use, but a set of each will also be available in the classroom for student use.
- You can read more about Math-U-See's *Algebra 1* level of math, including the scope, sequence, and example videos here:

<https://store.demmelearning.com/math-u-see/secondary-math/algebra-1/>

Grade Level: 8-9<sup>th</sup>

Instructor: Lindsay Wilson

Class Minimum Size: 3 students

## Geometry

The *Geometry* level of Math-U-See covers points, lines, angles, circles, triangles, quadrilaterals, the Pythagorean Theorem, conic sections, proofs, and more. Major concepts include describing points, lines, rays, line segments, angles, and planes; calculating the measure of the interior and exterior angles of a regular polygon; understanding the geometry of a circle, sphere, and ellipse; understanding and computing volume and surface area of solids; using the Pythagorean Theorem to identify triangle attributes; applying postulates, theorems, definitions, and properties to geometric proofs.

- You can read more about Math-U-See's *Geometry* level of math, including the scope, sequence, and example videos here:

<https://store.demmelearning.com/math-u-see/secondary-math/geometry/>

Grade Level: 9-10<sup>th</sup>

Instructor: Lindsay Wilson

Class Minimum Size: 3 students

HS Credit: 1.0 Math credit

Books	Author	ISBN
<i>Math-U-See Geometry Universal Set</i>	Math-U-See <a href="http://www.christianbook.com">www.christianbook.com</a>	WW504516

## Algebra 2

The *Algebra 2* level of Math-U-See covers factoring polynomials, quadratic formula, graphing conic sections, rational expressions, imaginary and complex numbers, and more. Major concepts and skills include simplifying multiple-degree rational expressions; working with imaginary and complex numbers; understanding and applying the Binomial Theorem; solving basic quadratic equations with factoring; applying analytic geometry to conic sections; solving simultaneous equations (linear and conic) using graphing, substitution, and elimination.

- You can read more about Math-U-See's *Algebra 2* level of math, including the scope, sequence, and example videos here:

## Science Department

The science program at Eagle Academy gives a solid foundation in all areas of science—a foundation firmly anchored to scriptural truth. Learning is assured through accurate, interesting writing, carefully planned demonstrations, chapter terms and questions, and full-color illustrations.

Two of our courses, Physical Science and Chemistry, require a certain level of math experience. **If your student is new to Eagle**, please make an honest assessment of their skill level before enrolling in one of those listed courses. The math pre-requisites needed for Physical Science and Chemistry are located in the class descriptions on the subsequent pages.

### Life Science: Order & Design

From exploring the creatures occupying your backyard, to studying the species that inhabit the rainforest, your student will receive a greater understanding of the beautiful world God has created. Topics included in this impressive text are: healthy living, exploring the animals of the sea, looking deep into the human body, the intricate designs of plant life, and more! Working together, students will be participating in class discussions and experiments, which will enrich their understanding of the material.

Grade Level: 7<sup>th</sup>

Instructor: Barbara Clift

Class Minimum Size: 4 students

## Earth Science

This laboratory-based earth science course covers the general properties of the earth’s geosphere, hydrosphere, and atmosphere. In the first semester, students will dig deep to discover soil, rocks, minerals, and the depths of the earth. We will study the rock cycle, plate tectonics, earthquakes, and volcanoes. Our fossil study will lead into a good look at the different views of both uniformitarians and catastrophists. In the second semester, we dive deep into the hydrosphere by studying waves, tides, currents, and ice. Afterwards it's up, up, and away we go, as we study our atmosphere, weather, and pollutants. Our study ends in space to cover the solar system and the universe.

<i>TBD</i>		
\$35.00 class fee for lab, payable via the online payment system		

## Biology: God’s Living Creation

With a strong emphasis on vocabulary and experiments, this course provides the student with a solid background in biology and human anatomy. Discussing the body, plants, mammals, cells, and genetics, this will be an enjoyable “hands-on” year of science. Offering this class in 9th grade gives those students another year of a math discipline to prepare for the next course in our science line-up—Physical Science: Matter and Energy.

Grade Level: 9<sup>th</sup>

Instructor: Barbara Clift

Class Minimum Size: 4?? students

HS Credit: 1.0 Science credit

Fourth Edition Books	Author	Abeka Code

## Physical Science: Matter & Energy

This well-laid-out course is filled with fascinating topics to enhance our understanding of the physical world. Students will cover energy, motion, chemistry, light, sound, electricity, and even magnetism!

**This course is designed for 10th graders who have completed Algebra 1, however is offered to mathematically strong 9th graders if they are currently enrolled in Algebra 1.**

Grade Level: 10<sup>th</sup>

Instructor: Bailey Cheben

Class Minimum Size: 8 students

HS Credit: 1.0 Science credit

First Edition Books	Author	Abeka Code

\$35.00 class fee for lab, payable via the online payment system		

## Chemistry

In this one-year, one-credit high school level chemistry course with a lab, we will be using the multi-award winning high-school college- prep chemistry course by Dr. Jay Wile, *Discovering Design with Chemistry*. This course includes sixteen chapters that cover topics such as the classification of matter, atomic structure, spectroscopy, chemical bonding, molecular geometry, physical change, chemical change, stoichiometry, solutions, ideal gases, acid/base chemistry, reduction/oxidation reactions, thermochemistry, thermodynamics, kinetics, and chemical equilibrium. Concepts are woven together with their mathematical applications to help students learn to think like chemists. Forty-six experiments are included and will be conducted in this course. Students must have access to a computer & internet in order to use online class material.

**Please note: Students must have completed Physical Science & Algebra 1 (with a confidence in balancing equations) prior to taking this class.**

Grade Level: 11<sup>th</sup>

Instructor: Jessica Cook

Class Minimum Size: 4 students

HS Credit: 1.0 Science w/lab credit

Third Edition Books	Author	ISBN
<i>Discovering Design with Chemistry</i>	Dr. Jay Wile	9780996278461
\$30.00 class fee for lab, payable via the online payment system		

## General Electives

In the middle and high school years, elective courses give students the opportunity to enjoy classes outside of a prescribed plan of coursework. This allows them to pursue other interests they may have, which can afford them a more "well-rounded" education. Listed below are the electives offered at Eagle Academy. A student may also take a "core" class as an elective if they have already met their minimum requirement for graduation in that subject area.

### Intro to Speech

This **one-semester course** teaches our students how to use their uniqueness to publicly inform and inspire others through storytelling, writing speeches with proper note-taking and researching techniques, interviewing credible sources, outlining thoughts for effective use, building confidence in body language, intonation, preparedness and organization, and developing skills of giving and receiving feedback. Students gain knowledge through lectures, critiquing well-known speeches, and preparing and delivering four speeches in front of peers, who give positive feedback while the instructor shares constructive feedback. With each speech, students are challenged to apply cumulative learning as they become a better communicator, which helps them fulfill the plans God has for them!

Grade Level: middle school

**\*Class not offered 2023-24**

Class Minimum Size: 4 students

**No books required**

### Intro to Logic

This **one-semester** Logic introductory class focuses on the second stage of learning in the Classical Trivium: the development of logical thinking. During adolescence, the student begins thinking more independently, asking questions, and searching for truth. Since students in this age range naturally love to present arguments, it is an ideal time to teach how to analyze statements, disputes, assumptions, and even advertisements. "The Fallacy Detective" is a text that, in a whimsical way, turns each student into a sleuth. Move over, Sherlock Holmes!

Grade Level: middle school

Instructor: Wanda Fisher

Class Minimum Size: 4 students

**\*Class not offered 2023-24**

Books	Author	ISBN
<i>The Fallacy Detective: Thirty-Eight Lessons on How to Recognize Bad Reasoning</i>	Nathaniel & Hans Bluedorn (Christian Logic 2015)	9780974531571 (Hardcopy Only)

## Introduction to Journalism

Knowing what is going on in the world and how to discern it through a Christian lens is a critical skill needed to transition into adulthood. In this **one-semester course**, students will look-up current events-logging them in a weekly worksheet along with defining words, discuss these events in class, and writing journalism paragraphs and four editorial essays. Skills learned: deciphering information, journalism terminology/key definitions/some history, and how to discern what to do with the information from the media.

Grade Level: high school

**\*Class not offered 2023-24**

Class Minimum Size: 4 students

HS Credit: 0.5 Elective credit

Books	Website
<i>Paid MONTHLY Subscription to World News Group (during semester)</i> <i>FREE Subscription to a newsletter sent by instructor</i>	<a href="http://www.wng.org/subscribe">www.wng.org/subscribe</a>
Students will need access to a computer outside of class.	

## Adult Planning /Job Prep

In this **one-semester course**, students will learn simple approaches to using planners, home organization, putting together a filing crate for adult paperwork, RESUME building/interviewing skills, and setting forth an action plan for one big passion project! These habits will aid in better daily organization which in turn improves your student’s study skills. Most of all, this class aims to teach your student how to seek God's plans in an intentional and practical way!

Grade Level: 10-12<sup>th</sup>

**\*Class not offered 2023-24**

Class Minimum Size: 4 students

HS Credit: 0.5 Elective credit

Books	Author	ISBN
<i>Flight: Develop Means by Connecting Wings to God-Given Dreams</i>	Amber Davis	9780692716380

## Speech and Debate

This **one-semester course** continues from Intro to Speech and teaches students how to apply voice, body language, preparation, support, and research while working solo and in groups. This class is heavily rooted in traditional logic teaching and Aristotle's approach to rhetoric with a Biblical view on influence as a key component of debate. Students will focus on organization of thoughts in the following areas of study: drama, poetry & prose, oratory speech, and debate, which introduces argumentation and rhetorical skills.

Grade Level: high school

**\*Class not offered 2023-24**

Class Minimum Size: 4 students

HS Credit: 0.5 Elective credit

Books	Author	ISBN
<i>Rhetoric Alive! Book 1: Principles of Persuasion</i>	Alyssan Barnes, PhD	9781600513008

## Logic I

This Logic course is a one-semester course based on the classical trivium and is designed to be an introduction to Formal Logic. Using this text, students will learn: 1) how to use language more effectively 2) how to define terms, 3) how to make accurate statements 4) how to construct arguments and detect fallacies 4) how to analyze opposing viewpoints 5) how to analyze scientific evidence 6) how to build a logical argument for what they believe, and 7) how to express their beliefs in a logical worldview, both in their speech and in their writing. The goal of Logic is not to teach a student how to build a better argument; rather, it is learning how to think biblically.

Grade Level: 10-12<sup>th</sup>

**\*Class not offered 2023-24**

Class Minimum Size: 4 students

HS Credit: 0.5 Elective credit

Books	Author	ISBN
<i>The Thinking Toolbox: Thirty-Five Lessons That Will Build Your Reasoning Skills</i>	Nathaniel & Hans Bluedorn	9780974531519 (Hardcopy Only)

## Logic II

Logic II is a continuation of Logic I, and is a one-semester course designed to be a high school course introducing the student to formal logic and the mysterious world of syllogisms. The primary goal of the course is to make the student aware of the language of formal logic, much like the language a student learns when taking algebra for the first time. Students must learn the rules for how Statements are constructed, and how to write them correctly using the only verb that is allowed. (You will find out the one and only verb allowed.) Students will learn what these terms mean and how to use them: the square of opposition, supported statements, truth and validity, and of course, what a syllogism is. The standard example of a syllogism is this combination of 3 sentences:

- A) All men are mortal
- B) Socrates was a man,
- C)Therefore, Socrates is mortal

After learning how to translate normal English statements into syllogisms, students will be able to determine which syllogisms are valid, and which are not. And here's the secret: out of 256 possible combinations of categorical statements, only 24 are valid combinations! Amazing...

**Please note: Students must have completed Logic I prior to taking this class.**

Grade Level: 10-12<sup>th</sup>

**\*Class not offered 2023-24**

Class Minimum Size: 4 students

HS Credit: 0.5 Elective credit

Books	Author	ISBN
<i>The Thinking Toolbox: Thirty-Five Lessons That Will Build Your Reasoning Skills</i>	Nathaniel & Hans Bluedorn	9780974531519 (Hardcopy Only)

## ACT Prep

This course will teach techniques specific to the ACT and sharpen students’ standardized test taking skills. We will discuss strategies and types of questions for English, Reading, Math, and Science and students will take practice tests in class and at home. Homework will consist of taking practice tests, reading the text, and analyzing mistakes made.

Grade Level: 10<sup>th</sup> -12<sup>th</sup>

Instructor: Christie Brassler

Class Minimum Size: 4 students

HS Credit: 0.5 Elective credit

Books	Author	ISBN
<i>The Official ACT Prep 2018-19</i>	ACT Inc	9781119508069
<i>ACT Prep Black Book: 2nd Edition</i>	Mike Barrett	9780692078396
<p><b>Notes:</b></p> <ul style="list-style-type: none"> <li>• <b>Used copies are welcome to be used but make sure if you are purchasing a used copy of the <i>Official ACT Prep 2018-2019</i> book that it doesn’t have writing in it. This book will contain our practice tests for the course.</b></li> <li>• <b>Make sure you have the ACT Prep 2018-2019 version and not a newer one. This pairs best with the black book.</b></li> </ul>		

## Graphic Design & Photography

Graphic design is the art of combining pictures and words to convey ideas. It is used in occupations such as business, advertising, and marketing. In graphic design, images are often the best way to get ideas across. People respond to images and process them regardless of what language they speak. Photographs are very effective images that can convey stories very quickly. Student will brainstorm, develop concepts, use creative thinking as well as critical thought, thinking ideas through, to innovate print and digital platform designs. Students will create the yearbook as homework and a final project. Students will combine the craftsmanship of graphic design and photography to design Eagle Academy yearbook and end of year video.

Grade Level: all ages

Instructor: Erin Forte-Froehling

Class Minimum Size: 4 students

HS Credit: 1.0 Elective credit

Supplies
Students will need access to a camera, tablet, or phone to take pictures and a computer to work on the yearbook.

## Computer Department

With computer literacy being vital to the success of today's students, these courses are offered as a means to innovate with technology, increase logical reasoning, and strength problem-solving skills well beyond the classroom.

### Computer Coding

This class will be a project-based introduction to coding with Scratch. Students will learn the basics of computer programming by creating a number of fun projects.

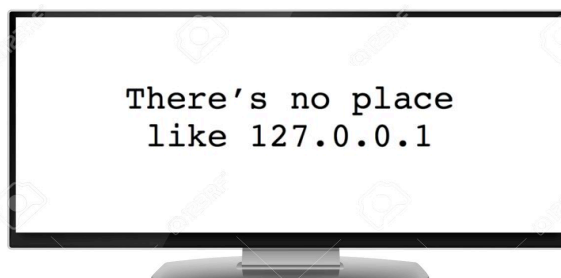

**Please note: students must have a Windows or macOS laptop computer for *in-class work* and programming assignments.**

Grade Level: middle school

**\*Class not offered 2023-24**

Class Minimum Size: 4 students

Books	Author	ISBN
Coding Projects in Scratch	Jon Woodcock	978465477347
Coding Games in Scratch	Jon Woodcock	9781465477330

### Computer Science

This class will provide an introduction to computer science with a focus on the fundamentals of programming. Students will learn how binary numbers work, how to develop algorithms, and how to express a variety of concepts using the Python programming language. Python is a great introductory language that has wide use, both in the classroom and in the real world.

**Please note: students must have a Windows, macOS, or Linux laptop computer for *in-class work* and programming assignments.**

Grade Level: high school

**\*Class not offered 2023-24**

Class Minimum Size: 6 students

HS Credit: 0.5 Elective credit

Books	Author	ISBN
TBD		

# *Fine Arts Department*

## **Drawing**

Instruction for Drawing class is based on “Drawing from the Right Side of the Brain,” a technique that allows students to draw what they see instead of what they *think* they see. Our early drawing of a house might be a square with a triangle on top. While that drawing is a representation of a house, it is not what a house really looks like. This technique gives instruction on how to draw the intricate details that make a drawing look “real,” while also enabling the students to portray their projects with perspective and proportion. As the year progresses, they will learn shading techniques, which give depth and value to a drawing. Students will also be instructed on how to effectively use other mediums such as pen and ink and colored pencils. After a few basic drawings are completed, students will be allowed to choose from other materials supplied and will progress at their own speed. Based on specific supply needs, this class has no homework requirement, which produces a deficit in hours to fulfill a high school Fine Arts Elective credit. Parents are encouraged to combine the 32 class-time hours with other outside activities in order to reach a half or full credit.

**Please note: No HAS Forms will be created for this class.**

Grade Level: all ages

Instructor: Amanda Phillips

Class Minimum Size: 6 students

HS Credit: Approx .2 Fine Arts Credit

### **Supplies**

\$25.00 class fee, payable via the online payment system

## **Choir**

Music is a gift from God—designed for praise, worship, inspiration, and enjoyment. Students are encouraged to develop their musical abilities to their fullest potential while honoring the Lord through excellence. This is a non-auditioned, full-year choral ensemble, open to middle and high school students with any choral background or a passion for developing in the area of music. The purpose of this choir is to bring glory to God through the performance of music. The course of study consists of developing proper vocal technique, ear training, sight reading, music theory, music listening, historical knowledge, and ensemble singing. Students will experience a range of exposure from appropriate genres and time periods to the purpose and implementation of Praise & Worship music in our lives as believers.

Grade Level: all ages

Instructors: Leeann Cooper (middle school)

Wallicia Smith (high school)

Class Minimum Size: 5-6 students

HS Credit: 1.0 Fine Arts Credit

### **Supplies**

\$20.00 class fee, payable via the online payment system

## Introduction to Music Appreciation

This **one-semester course** will serve as an introduction to music. Students will explore music's various functionalities in order to gain a deeper understanding and appreciation for appropriate types of music. The course begins by examining basic music literacy and core elements such as melody, rhythm, harmony, form, and texture. During the course students will apply their understanding through music composition, and they will focus on its various purposes and functions. They will use this understanding to safely track the historical transformation of music in various areas of application. Genres studies will include Christian and Classical.

Grade Level: middle school

**\*Class not offered 2023-24**

Class Minimum Size: 4 students

### Supplies

\$15.00 class fee, payable via the online payment system

## Music Appreciation

This **one-semester course** will explore the history and elements of music to discover what makes it interesting and enjoyable. Students will acquire basic knowledge and listening skills, making future musical experiences more informed and satisfying. This course will examine the establishment of music from the Middle Ages through the 21st century while evaluating the role of Christian music in our society. Genres studied will include Christian and Classical.

Grade Level: high school

**\*Class not offered 2023-24**

Class Minimum Size: 4 students

### Supplies

\$15.00 class fee, payable via the online payment system

## Song Writing

Song Writing is a **one-semester** class designed for beginners or for anyone wanting to improve their songwriting skills. This course covers the basics of songwriting allowing students an opportunity to write one or two songs. This course concentrates on the study of lyric writing, and song construction as we learn the different songwriting forms. **Students will need a thesaurus for this class.**

Grade Level: high school

**\*Class not offered 2023-24**

Class Minimum Size: 4 students

HS Credit: 0.5 Fine Arts Credit

### Supplies

\$15.00 class fee, payable via the online payment system

## Worship & Technical Arts

Students will be hands-on with state-of-the-art worship equipment and utilize what they have learned in weekly practical performances. We will explore the worship leader mindset, Planning Center essentials, beginners church sound mixing, ProPresenter essentials, basic music theory for performers and worship leaders, cameras, multi-tracks, and in-ear monitoring. No experience is necessary for tech positions. The end goal is to have students be able to set up, perform, and break down their productions with confidence by the year's end. Please note that this elective is a 1.5hr class due to the amount of time needed to cover new material and give students adequate hands-on time with their equipment.

Grade Level: all ages

Instructor: Jim Patten

Class Minimum Size: 10 students

HS Credit: 1.0 Fine Arts or Elective Credit

### Books/Resources

\$75.00 class fee, payable via the online payment system will cover any software licenses needed for this class. No text book required.

# Foreign Language Department

## Sign Language 1

This program will offer students a basic course in American Sign Language as they learn the vocabulary necessary to communicate with someone who may be deaf or hard of hearing. We will learn and grow in our understanding of deaf culture while having fun studying a beautiful language! We will have various opportunities in class to practice and use the skills we are learning. Students will also be taught a worship song in sign language that they can perform together. The best part is, as we sign, we will shine for Jesus and use our hands to bridge the gap between the deaf and hearing worlds!

**Please consult your umbrella school to determine whether this class counts as a foreign language or elective credit for your high school student.**

Grade Level: high school

**\*Class not offered 2023-24**

Class Minimum Size: 6 students

HS Credit: 1.0 Foreign Language Credit

Books	Author	ISBN
<i>The Joy of Signing 3<sup>rd</sup> Edition</i>	Lottie L. Riekehof	1607313618

## Sign Language 2

Continuing where Sign Language 1 concludes, this program will help students progress in their understanding and fluency of American Sign Language, allowing them to communicate with someone who may be deaf or hard of hearing. We will learn and grow in our understanding of deaf culture while having fun studying a beautiful language! We will have various opportunities in class to practice and use the skills we are learning. Students will also be taught a worship song in sign language that they can perform together. The best part is, as we sign, we will shine for Jesus and use our hands to bridge the gap between the deaf and hearing worlds!

**Please note: Students must have completed Sign 1 prior to taking this class.**

Grade Level: high school

Instructor: Stacie Livingstone

Class Minimum Size: 6 students

HS Credit: 1.0 Foreign Language Credit

Books	Author	ISBN
<i>The Joy of Signing 3<sup>rd</sup> Edition</i>	Lottie L. Riekehof	1607313618

## Latin 1

Using *First Form* from Memoria Press, which is the first in a four-part system, students will focus on mastering grammar forms and vocabulary. As Latin is a "dead language," the emphasis on conversation is taken away, allowing the student to engage the Latin grammar forms and vocabulary without the pressure of pronunciation and inflection. After being introduced to a new concept and approximately 10 vocabulary words during class time each week, the student will do daily activities to help cement this information.

*It is **extremely important** that all students are utilizing the same edition of books. Please pay careful attention to the editions and ISBNs listed. We strongly encourage you to order directly from [www.memoriapress.com](http://www.memoriapress.com) to ensure you are getting the correct editions. Other popular retailers are currently selling first edition books, which are not used for this class.*

Grade Level: high school

**\*Class not offered 2023-24**

Class Minimum Size: 4 students

HS Credit: 1.0 Foreign Language Credit

Ruplen*

## Latin 2

In this class, students continue on their journey of learning Latin grammar. Memoria Press' *Second Form* reviews all material found in *First Form*, completes the verb paradigms for all four conjugations in the indicative active and passive, and much more! Class time will be used to review the previous week's content, followed by the introduction of new content. Time at home is used to master each week's vocabulary and grammar forms.

**Please note: Students must have completed Latin 1 prior to taking this class.**

Grade Level: high school

## Spanish 1

In this class designed for beginners, students will learn Spanish much like they learned their first language - by doing - through games, repetition, and listening to conversations. The instructor takes into consideration various learning styles and includes lots of interaction, movement, and fun while learning. A variety of vocabulary topics will be covered and students will be able to answer basic questions by the end of the class. Grammar and spelling will be taught while studying the book "Pobre Ana" (provided by the instructor). Homework every week will include oral presentations, group activities, and written assessments. Students will need access to the apps "What's app" and "Quizlet" either on their phone or their parent's phone for homework.

Grade Level: high school

Instructor: Patricia Aguilar

Class Minimum Size: 6 students

HS Credit: 1.0 Foreign Language credit

Books	Author	ISBN
<i>Participant Guide from CALA (Center for Accelerated Language Acquisition)</i>  <i>Pobre Ana</i>	All texts and handouts provided by instructor.	
\$50.00 class fee, payable via the online payment system		

# *Economics & Personal Finance*

## **Economics**

This is a **one-semester course** where students will explore the subject of Economics topically via readings, videos, discussion, and assignments. Topics include but are not limited to scarcity, supply & demand, free markets, competitive trade, opportunity cost etc. *Please note that the instructor is still developing this course and a more in-depth class description as well as the correct edition of one of the books will be provided closer to the course starting in spring semester.*

Grade Level: 11<sup>th</sup>–12<sup>th</sup>

Instructor: Christie Brassler

Class Minimum Size: 6 students

HS Credit: 0.5 History credit

<b>Books</b>	<b>Author</b>	<b>ISBN</b>
<i>Common Sense Economics (edition TBD)</i>	James D Gwartney, et al.	Will be provided once edition of book is decided upon.
<i>Whatever Happened to Penny Candy?</i>	Richard J. Maybury	9780942617641

## **Personal Finance**

This **one-semester course** is designed to ensure that your high school student has some practical knowledge to positively impact their personal finance success. Using Dave Ramsey’s high school curricula as a launching pad, students will learn about saving and investing, credit and debt, financial responsibility and money management, insurance, income, and life after high school (college and careers). This class will be largely project driven. Students will be given hands-on opportunities to create budgets, participate in a stock market simulation, evaluate insurance needs, balance checkbooks, research car purchases, and investigate college scholarship opportunities. *This class is best suited for 11-12th graders however if a sophomore has a stream of income, an exception may be made by discussing with the instructor.*

Grade Level: 10<sup>th</sup>-12<sup>th</sup>

Instructor: Christie Brassler

Class Minimum Size: 4 students

HS Credit: 0.5 Personal Finance credit

<b>Books</b>	<b>Author</b>	<b>ISBN</b>
Students are required to read a non-fiction book of their choice during the semester. Students will be given guidelines for selecting this book on the first day of class and it is up to parents if they want to purchase the book or borrow one from a library.		
\$15.00 class fee, payable via the online payment system		

## Wellness Department

The primary aim of these courses is to motivate students to take responsibility and initiative for maintaining their own health. Students will master the elements of nutrition, physical health, safety, and more, while deepening their understanding of God's call to honor their temple.

### Physical Education

Students will enjoy an interruption from academically based subjects in this **one-semester course**. A variety of physical activities will be introduced, which will teach skills that promote a healthy, active lifestyle. Exercise, various sports, and games are a few of the areas on which the students will focus. All students will be provided with instruction for physical activity outside of class. **This class may be taken more than once.**

Grade Level: all ages

Instructor: Stefani Zangmeister

Class Minimum Size: 6 students

HS Credit: 0.5 Wellness credit

**No books required**

### Health

This **one-semester** class is for high school students and is designed to provide a thorough understanding of all important physical, mental and social health issues. The text is written directly to teens from a caring and friendly perspective, *Total Health* presents a moral basis for a healthy lifestyle based upon scriptural principles. Topics include: anatomy, body systems, food choices, exercise, diseases (including a few STDs), stress, emergencies, responsibility, and more.
